

Artist Bio  
LaurenAsh

She Is... LaurenAsh. Dubbing herself a 'Soul Rebel' daring to breakdown the stigmas that tend to define an artist and the music intended to be offered to the world. A formative writer and producer with a knack for poetry, Hip-Hop and Neo-Soul, she brings her spirit and soul to the world.

Back in 2013, she released her first single, 'She Is' as an ode to female empowerment and the essence of being a bad-ass woman with no fears or limitations. A journey through life, love, and travel sent LaurenAsh on a trip through self-exploration where she spent the early stages of the pandemic crafting her debut EP, 'The Soul Rebel Show' in 2020. This project allowed her to explore the many different aspects of who she is and how she chooses to define herself as not only a woman but a person navigating this thing, we all call life.

Fast forward through the many uncertain, gut-wrenching, emotional yet freeing times of the pandemic, she is back to exploring her roots in the realm of Hip-Hop. Her 2021 single, 'Where Is the Love' takes us on a journey through the nostalgic era of 90s Hip-Hop with a spin on Common's infamous, 'I Used to Love Her'. Her reference to love as the core element of connection through relationships be them romantic, platonic, or simply serendipitous is at the core of this new vibe.

*"In all experience, there lies wisdom"* LaurenAsh reflects as she prepares to release her second EP "NativeThoughts" later this Fall. She's spent the last two years healing and growing mentally, physically, and spiritually and invites people into her mind's diary.
